

Jaired Jawed

me@jairedjawed.com | github.com/jaireddjawed | linkedin.com/in/jaired

SKILLS

Languages: Go, TypeScript/JavaScript, Python, SQL

Frontend: React, Next.js

Backend: Node.js, GraphQL, gRPC, REST APIs, WebSockets

Infrastructure/Cloud: Kubernetes, Terraform, Vault, Docker, AWS, Azure

Databases: PostgreSQL, MongoDB, Neo4j

Developer Tooling: AI Agents, GitHub Actions, CI/CD, Datadog

EXPERIENCE

HashiCorp

Nov. 2024 – Present

Software Engineer, Vault Ecosystem

Remote

- Led development of **real-time secret synchronization** in the Vault Secrets Operator, enabling Kubernetes workloads to receive updated secrets without restarts through WebSocket-based updates.
- Developed **PKI External CA integration** for Vault Agent, automating certificate issuance and renewal through ACME and enabling applications to consume externally signed certificates without manual lifecycle management.
- Developed **Azure Static Roles** support in Vault, enabling secure management of long-lived Azure credentials for enterprise environments.
- Built orphaned secret cleanup workflows in the Vault Secrets Operator, reducing stale secret accumulation and improving Kubernetes operational hygiene.
- Mentored a junior developer and two interns through onboarding, accelerating ramp-up and enabling them to contribute independently to production projects.

HashiCorp

Aug. 2023 – Nov. 2024

Software Engineer, Vault Dedicated

Remote

- Led development of validation and synchronization systems for Vault Dedicated, enabling secure Secret Sync replication across Vercel, Google Cloud, and Azure.
- Built disaster recovery health checks and automated Route 53 failover workflows for highly available Vault infrastructure deployments.
- Participated in on-call rotations for production Vault infrastructure, troubleshooting outages and restoring service during critical incidents.

HashiCorp

June 2022 – Sept. 2022

Software Engineer Intern, Vault Dedicated

Remote

- Developed cluster filtering functionality by creation date and tier in Vault Dedicated, improving operational efficiency for incident response workflows.

Chegg

June 2021 – Aug. 2021

Software Engineer Intern

Remote

- Developed secure CRUD APIs for internal student data management workflows, replacing direct SQL query processes and reducing operational risk.

PROJECTS

Angelic Ascensions | **Full-Stack E-Commerce & Scheduling Platform**

2025 – Present

- Built and operate a production **Next.js/TypeScript e-commerce and appointment scheduling platform** processing **\$3K+ in transactions per month**.
- Designed a concurrency-safe scheduling system using **PostgreSQL transactions and database locking** to prevent double bookings and race conditions between customer purchases and administrative availability updates.
- Built checkout, payment processing, automated reminders, and account-based booking workflows, contributing to a **50% increase in sales**.

EDUCATION

University of California - Riverside

Riverside, CA

M.S. Computer Science, Dec. 2025 | B.S. Computer Science, Aug. 2022
